SERVICE TECHNICIAN TRAINING PACKAGES 2008/9

**Our most popular courses in package form, some offering a
10% discount over individual course prices**

ASSOCIATION OF SCUBA SERVICE ENGINEERS & TECHNICIANS

DITC Standard

◆ DIVE INDUSTRY TECHNICIANS COURSE (DITC) - 10 days

This is the 10-day A.S.S.E.T. & S.I.T.A. and IDEST approved course, covering all aspects of service, repair and workshop operation. The course has a 9-module curriculum supported by 'The Dive Industry Technicians Handbook' specifically written to accompany the course.

The course is designed to give as much emphasis as possible to practical knowledge and skills with a large proportion of the course devoted to 'hands on' practical work.

Repair sessions include full 'strip down & rebuild' tasks on most major makes of regulators and Valves, together with user level maintenance of Compressors and air banks systems.

US\$1,960

DITC Gold

◆ DITC + CYLINDER TESTING TECHNICIANS COURSE Pt2- 12 days

The entire comprehensive technician training from the DITC plus Advanced Cylinder inspection and hydrostatic testing, with emphasis on advanced Metallurgy knowledge and inspection of known cylinder defect conditions with analysis of borderline pass/fail samples. A comprehensive final practical exam, tests the individual's ability to detect cylinder defects yet not to 'condemn' truly serviceable tanks. Pt1 is covered in the DITC. This course is a pre-requisite for all new Centres applying for IDEST Test House Approval.

US\$2,530

DITC 'Platinum'

...10% off individual course prices!

◆ DITC + Cyl. Testing Pt2 + NITROX TECH & GAS BLENDER- 14 days

The A.S.S.E.T. Nitrox Service Technician & Gas Blender Courses are of the same high standard as the Dive Industry Technicians Course. Developed to reflect the Engineering, Gas Industry, & International standards. Essential for anyone who is serious about NITROX. The course includes comprehensive Gas Blending sessions and Oxygen Cleaning scuba regulator practical work. Also continuous blending Nitrox, Trimix and includes free gas blending software.

US\$3,100

COMPRESSED AIR SYSTEMS MANAGEMENT (CASM)- 2 Days

For Diving industry or other industry employees who have responsibilities for filling high-pressure cylinders, and carrying out day-to-day 'user level' maintenance on compressors. The course covers general compressor maintenance, Air Bank operation, standards and relevant legislation. Practical work on user level maintenance, Air bank use to 300Bars. Filter choice and replacement. Tank Identification for operator safety. Air purity Testing. Compressed air safety, Compressor Theory of operation. Based on the popular 'Bauer' & 'Coltrissub' compressor models. This course is included in the DITC.
