### Introduction of the new synthetic compressor oil N28355 for industrial use

In course of the ongoing development BAUER Kompressoren GmbH has tested a new synthetic compressor oil. The outcomes of this test are very positive and state a new performance level.

Even after 2000 operating hours none of the tested machines showed significant deposits (carbonisation, etc.).

## TECHNICAL NOTIFICATION

Replacement directly:

2/2

Replacement during time:

Due to the very positive results the new synthetic compressor oil **N28355** is now introduced as first choice for all industrial compressors of BAUER. For these applications the former mineral oil **N22138 SHELL Corena P150** and the optional synthetic oil **N18145 Mobil RARUS 829** (gas types) will be replaced by the new one.

In addition diving air applications that operate under rough conditions can be delivered with the new oil, too, upon request.

In this case the former optional **N19745 Liqui Moly LM750** which is no longer state-of-the-art can be replaced by **N28355**, as well.

Purchase order numbers:

<b>N28355-0.5</b>	0,5 litre container
<b>N28355-1</b>	1,0 litre container
<b>N28355-5</b>	5,0 litre container
<b>N28355-20</b>	20,0 litre container

Introduction will be end of June 2006.
